

Welcome to the Univ. of Toledo CHARA Community Workshop

Douglas Gies

Director

Center for High Angular Resolution Astronomy
Georgia State University

www.chara.gsu.edu

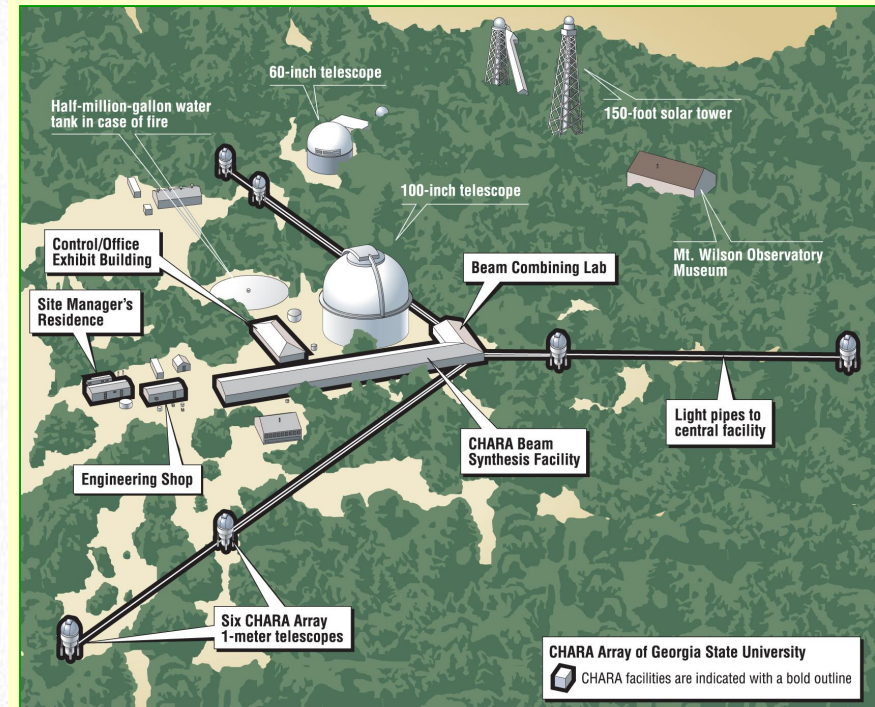

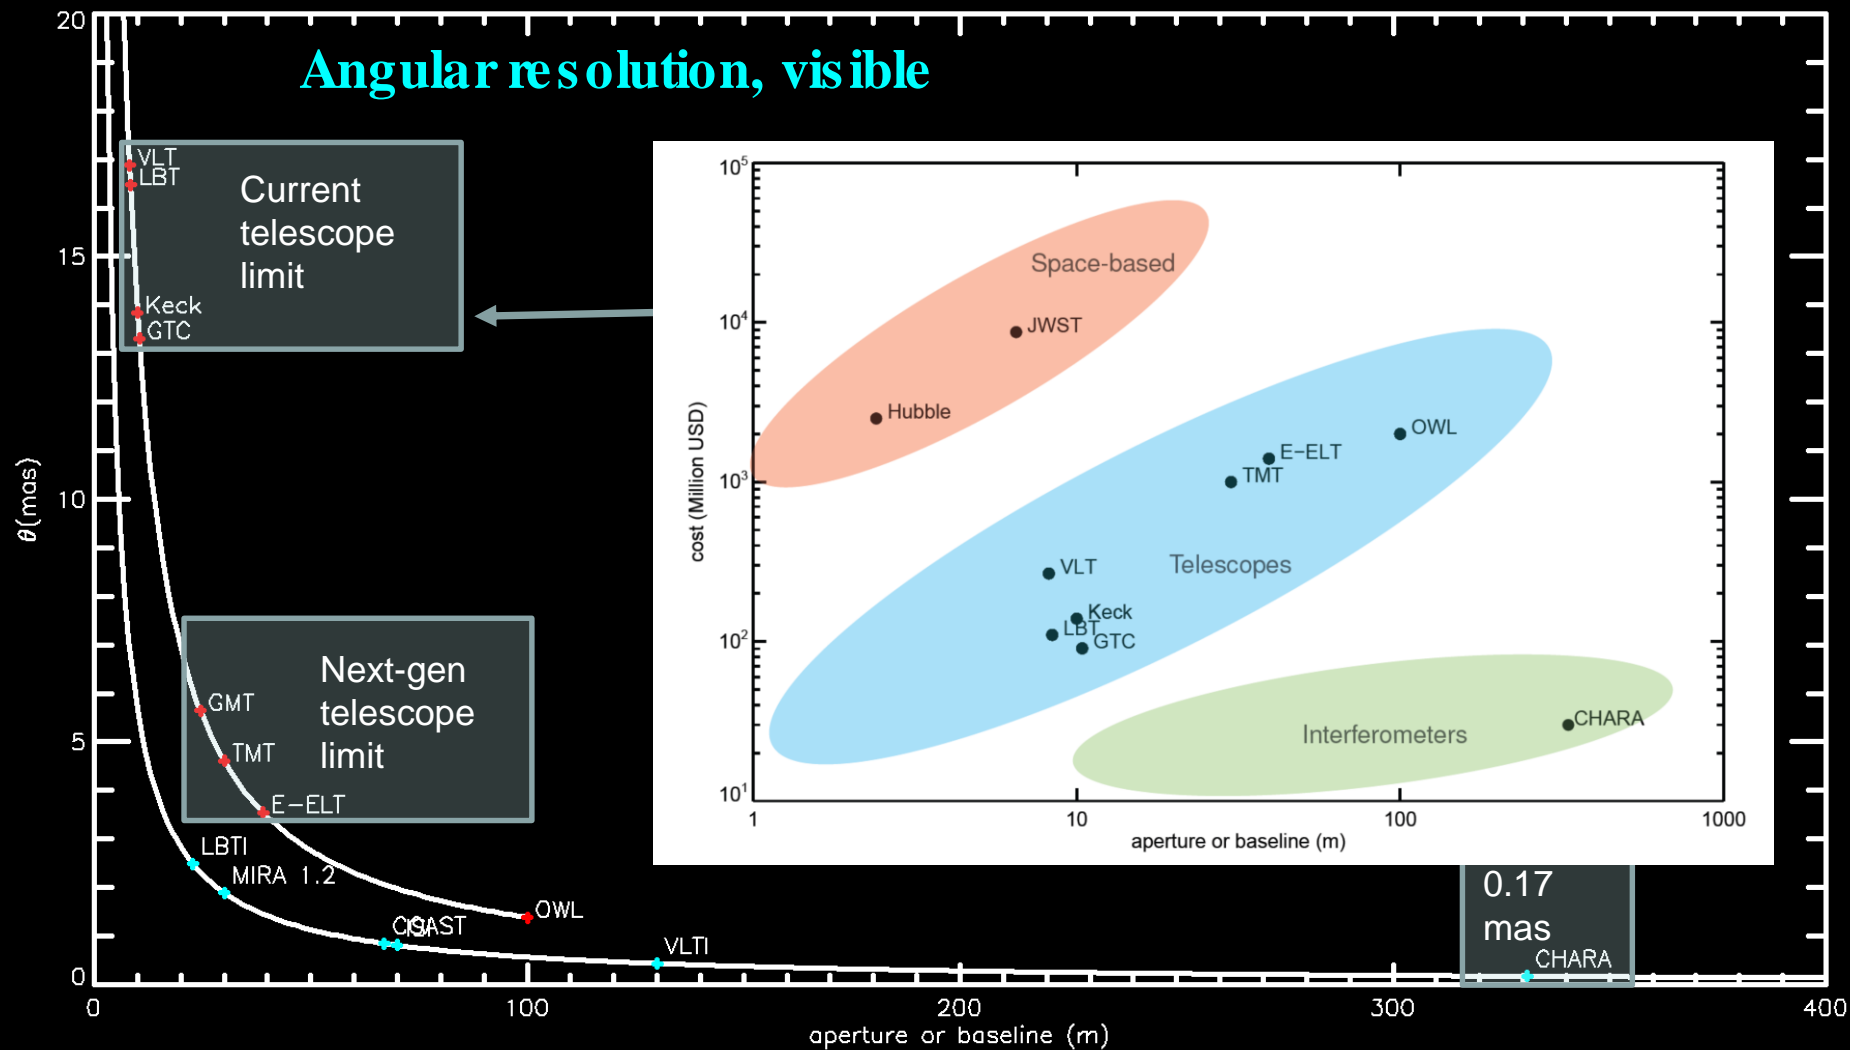

Your hosts

- **Douglas Gies**, CHARA Director,
Dept. of Physics and Astronomy,
Georgia State University, Atlanta, Georgia
- **Gail Schaefer**, Visitor Support Scientist,
GSU CHARA Array, MWO, California
- **Noel Richardson**, Department of Physics and
Astronomy, University of Toledo
- THANKS to University of Toledo and NSF!

Stellar interferometry: measuring star size

- Michelson and Pease (1920): Betelgeuse
- Required technology (lasers, optics, computers)
- Culmination at Mount Wilson in CHARA Array: resolves most stars visible to human eye

The 1996 Olympics

It's Atlanta!

City explodes in thrill of victory

Atlanta defeated on 5th vote

By Bert Roughton Jr. and Karen Rosen Staff writer

TOKYO — Atlanta's Olympic dream has come true. Promising to stage the best Olympics the world has known, Atlanta today won the right to play host to the 1996 Games, which will mark the beginning of the second century of the modern Olympics. Atlanta will be only the third U.S. city to host the Summer Games.

The nearly 400 Atlantans scattered around the enormous, ornate ballroom of the new Takawana Prince Hotel exploded into cheers as International Olympic Committee (IOC) President Juan Antonio Samaranch made the simple announcement.

"The International Olympic Committee has awarded the 1996 Olympic Games to the city of Atlanta," Mr. Samaranch said.

Atlanta Organizing Committee (AOC) President Billy Payne embraced former Mayor Andrew Young and Mayor Maynard H. Jackson, who were sitting on the front row, in front of a stage where the IOC members were standing.

Charlie Butler, an AOC member whose personal skills at lobbying IOC members were a key to Atlanta's win, said he was "shocked."

"I'm excited. I'm elated. I'm shell-shocked," he said. "I can't express it. I'm at a loss for words."

Martina Payne, Mr. Payne's wife, sat on the edge of her seat until the announcement and then hugged their daughter, Elizabeth, and son, Porter. Vince Dioso, an AOC volunteer, said, "According to the guy who is doing it, it's the biggest fireworks display that's ever been done in Atlanta."

The 7:49 a.m. announcement of Atlanta's victory will be replayed continuously on large television screens at Underground 15 minutes before the top of every hour, Mr. Olsen said.

'We finally won something!'

By Gary Pomerantz Staff writer

Some 126 years after Atlanta lay in smoking ruin, the city emerged today as an international superstar.

Soon after daybreak at the Peachtree Fountain Plaza of Underground Atlanta, an estimated crowd of 2,000 watched a satellite television feed from Tokyo and learned that Atlanta had captured the 1996 Olympic Games.

The reaction was immediate: 2,500 balloons were released, confetti was shot from cannons, fireworks exploded in the morning sky, blacks hugged whites, and school kids playing hockey screamed at the top of their lungs.

A businessman in a gray suit squandered a construction worker holding a lunch pail. An elderly woman cried.

Call it a Greek tragedy and send a God-Well-Soon card to Athens, express mail.

For Atlanta, a city that long has been skeptical of great events, the victory was a triumph.

Fireworks tonight, parade on Monday

By Bert Smith III Staff writer

Let the party begin.

The citywide celebration kicked off by the announcement of Atlanta's acquisition of the 1996 Olympic Games continues tonight and into next week, culminating in a ticker-tape parade Monday for the Atlanta Organizing Committee (AOC) on Peachtree Street.

Thousands of metro Atlantans were expected at Underground to listen to Dorianland Jazz, reggae and rock bands, surf up to see the AOC, and see a fireworks display at 8:45 p.m.

"It will be quite spectacular," said Laurie Olsen, an AOC volunteer. "According to the guy who is doing it, it's the biggest fireworks display that's ever been done in Atlanta."

The 7:49 a.m. announcement of Atlanta's victory will be replayed continuously on large television screens at Underground 15 minutes before the top of every hour, Mr. Olsen said.

Resolving power of CHARA equivalent to seeing astronauts on the Moon ...

or reading the line print in a newspaper from across the country

The CHARA Legacy of Prof. Hal McAlister

Founded in 1984 GSU Center for High Angular Resolution Astronomy with goal to build a world-class instrument.

Realized with the CHARA Array, the best of its kind in the world.

Ground breaking July 13, 1996.

First “fringe” November 1999.

Scientific observations since 2004.

Hal retired (Aug 2015), now emeritus professor at GSU.

By using NIR and Visible light instead of radio waves, we can achieve the same angular resolution as VLBA but with a much smaller interferometer

Goal: provide background for you to propose observations with the CHARA Array. *Morning Program*

Time	Topic	Speaker
11:00	Overview of the CHARA Array	Douglas Gies
11:30	Interferometry & Science Review	Gail Schaefer
12:10	Applying for time at CHARA	Douglas Gies
12:40	Applying for time at VLTI	Jean-Baptiste Le Bouquin
1:00	Lunch	

Afternoon Program

Time	Topic	Speaker
2:00	Observing strategies and planning software	Gail Schaefer
2:20	Data format and modeling/imaging software	Gail Schaefer
2:40	<i>Science topic:</i> Imaging results with MIRC	John Monnier
3:00	<i>Science topic:</i> Massive stars	Noel Richardson
3:20	<i>Science topic:</i> Disk physics	Aaron Sigut
3:40	Open discussion	All
4:00	Optional visit to Ritter Observatory	Noel Richardson
